

Tasmania Mine

BCD Resources (operations) NL, manager of the Tasmania Mine at Beaconsfield, is currently seeking a suitably qualified and experienced individual to undertake the following position:

Environmental Engineer

Re-advertised

This position will report to the Technical Services manager and is responsible for the further development, monitoring, compliance and environmental impacts of the operation in accordance to its obligations under the site EPN.

The key function of this role is to minimise the environmental impacts and the risk of long-term environmental liabilities. You'll be heavily involved in:

- Update and oversee the site environmental management plan.
- Collect samples for analysis as per the requirements of the mine permits.
- Update the mine closure plan and initiate remediation where possible.
- Oversee tailings dam lifts and rehabilitations
- Compile and deliver annual environmental reports
- Scrutinise data to optimise/streamline data collection for maximum benefit.
- Liaise with community stakeholders on environmental impacts.

This position will suit an experienced professional or a dynamic young practitioner who is looking for a new challenge and opportunity to contribute to our organisation.

To be considered candidates preferably have tertiary qualifications in Environmental Engineering/Science together with exposure to mine site process plants or heavy industry.

This is an opportunity to develop your career further in a small multi-disciplinary team as well as an attractive location and lifestyle.

Send your CV outlining your relevant experience for immediate consideration.
