

## Mining Engineer

- Residential Location
- Fantastic Lifestyle
- We offer a challenging role and the opportunity to develop your mining skills further.

We currently have a vacancy at our Tasmania Mine due to an internal promotion. BCD Resources (Operations) NL, manager of the Tasmania Mine at Beaconsfield, is seeking a suitably qualified and experienced individual to undertake the position of Mining Engineer:

Reporting to the **Senior Mining Engineer**, you will be responsible for:

- Design and implementation of all aspects of production drilling and blasting.
- Liaise with the mine foremen to ensure production targets are met.
- Co-ordination of short term projects and business improvement initiatives.

As the successful candidate you will be a degree qualified mining engineer, or have similar practical experience or qualification, and have at least 2-4 years experience with exposure to underground mining.

You will have strong verbal and written communication skills as you will need to be interact with a cross section of mine personnel on a daily basis.

As the successful candidate you will have demonstrated that you are a motivated self starter who is able to work independently but as well as a contributing team member. Your attention to detail and strong safety ethic will be highly regarded for this role.

We are able to offer you a competitive salary, the opportunity to develop your career further within a small multi-disciplinary team as well as an attractive location and lifestyle.

**Send your CV outlining your relevant experience for immediate consideration!**
