

Tasmania Mine

- Residential Role
- Challenging environment
- Unbeatable lifestyle

BCD Resources NL is an Australian listed gold producer and generating strong cash flow from annual gold production in excess of 70,000 ounces from the Tasmania Mine located in northern Tasmania and is currently seeking a suitably qualified and experienced individual to undertake the following position:

Underground Manager

Reporting to the Mining Manager, the role will require you to be responsible for the following key areas:

- Ensure safety and environmental standards are met and promote Tasmania Mine Health and Safety Policy;
- Provide strong leadership to the members of the mining team
- Develop the underground production strategy for achieving the agreed targets of the operation and review progress against these plans continually;
- Liaise with key stakeholders to provide optimum mine designs and schedules;
- Review all production budgets, forecasts and reports on a regular basis;
- Develop a culture of continuous improvement

The successful candidate will be an experienced professional who is results driven, highly motivated and is seeking new challenges in underground mine operations.

To be considered candidates will have a degree in mining engineering, at least ten years in underground mining, preferably with exposure to narrow vein mining.

A Statutory Certificate of Competence (e.g. WA First Class Mine Managers Ticket or equivalent) would be considered highly advantageous.

Experienced Underground Managers and highly talented Senior Engineers looking for the next step are encouraged to apply.

Send your CV outlining your relevant experience for immediate consideration!
