

**BEACONSFIELD  
GOLD N.L.**

A.C.N 057 793 834

## **STOCK EXCHANGE ANNOUNCEMENT**

### **UPDATE ON OPERATIONS AT BEACONSFIELD**

Following the tragic incident at the Beaconsfield Mine on 25 April 2006, underground mining operations are suspended while the safety of the mine is investigated by the Tasmanian Chief Inspector of Mines.

Beaconsfield Gold is encouraged that, at a meeting of mine workers held in Beaconsfield yesterday, the unanimous decision of the workers was that the mine should progressively reopen in those areas of the mine that are established to be safe.

While mine operations are suspended, the ore treatment plant has continued to process previously stockpiled material.

The Company acknowledges strong support expressed by a number of large shareholders in assisting Beaconsfield Gold going forward.
